Support

I would like to register my \*qualified\* support for this proposal.

As other respondents have identified, a grocery shop that is sympathetic to the local area, enabling active transport, local employment, and supporting surrounding businesses would be welcome. A 'dropped in' design that ignores the community, and local streetscape is not.

My primary concerns from the provided detail is the lack of interaction with the streetscape, and no clear support for active transport / local shopping options. Obviously some car parking is required, but this is a prime opportunity to improve the mess of street parking, merging lanes, no bicycle lanes or safe walking access. Provision for cycling access and parking, along with street shading from heat and rain (storms) is essential.
